Natural Resources for Human Health

Aim & Scope

Natural Resources for Human Health covers a wide range of natural science disciplines. Such fields can be at all aspects of works bearing on natural compounds of plants, algae, microbes and animals. Manuscripts of basic and applied research are welcome, clear kinetic hypotheses are created, and descriptive approaches are prevented. In addition, high-quality review articles will be considered, following an integral approach and stimulating thinking for future research pathways.

Natural Resources for Human Health welcomes high-quality manuscripts related (but not limited) to life science research and:

- Biology: Taxonomy, conservation and genomics approaches for the conservation of critically endangered species.
- Biological Chemistry: Understanding the chemistry of living things.
- Medicinal Chemistry: Toxicology, Pharmacology, Pharmacognosy, Nutrition and Health, Therapeutics, Bioactive Compounds, Detoxification, Biological activities.
- Pharmaceutical Formulations: Formulations from natural products, Analysis, Quality Controls.
- Agricultural and Food Chemistry: Food Technology, Agricultural and Food Safety, Food analysis.
- Applications of Natural Resources: Cosmetics, Dietary Supplements, Nutraceuticals, Bio-Pharmaceutical Science, Waste and co-product valuation.
- Traditional Medicine: folkloric medicine, ethnobotany, ethnopharmacology.

Investigating the In Vitro Anti-Obesity Activity of the Ultrasonic-Assisted Extraction Process of Alkaloid- Rich Extract from265 *Mansoa alliacea* Flowers Using Response Surface Methodology

Linh, T. C., Pham, D. T., Mai, D. V., Lieu, N. H. B., Dinh, P. K., Duc, C. K. T.

Anticarcinogenic Properties of Metabolites Extracted from Endophytic Fungi: A Review of the Literature279

Rivera-Cazaño, C. V., Diaz-Blas, P. A., Quiñones-Laveriano, D. M., Villar-Lopez, M. I.

Sandfish (*Holothuria scabra*) Ethanolic Extract Mitigates Ethylene Glycol-Induced Acute Kidney Injury in Rats 300

Anugrah, A. D., Asmara, A., Leman, Y., Djabir, Y. Y.

Mineral and Trace Element Quantification, Phytochemical Composition, Antioxidant, and Antimicrobial Activities of *Gladiolus dalenii* van Geel Corms: Potential Applications in the Food and Pharmaceutical Industries 310

Cumbane, P. J., Machava, A. F., Niyragira, A., Quessaugy, K., Machute, L., Ruco, T.

Exploring the Relationship Between Inflammatory Cytokines and PCOS Development: A Cross-Sectional Analysis 321
